FOR IMMEDIATE RELEASE:

**SEMINAR: "APPLYING INFRARED (IR) THERMOGRAPHY TO
MARINE SURVEYING"**

Allinson Infrared Inspection Services, Inc. is pleased to announce that John (JACK) N. Allinson, II, Accredited Marine Surveyor and Certified Infrared Thermographer will be conducting a one (1) day seminar on Saturday 6 February 2010. The seminar will be located at the Prime Osborne Convention Center in Jacksonville, Florida in conjunction with the 63rd Annual Jacksonville Boat Show.

Details may be found at <http://www.airisinc.com/AIRTTMS.html>

Seminar is designed for six (6) CEU's and is competitive with rates charged for Infrared Thermography training. Early registration offerings start at \$450 per person. Registration fee includes a copy of seminar presentation materials.

Registration for seminar has begun and payment may be made by credit card, PayPal or check. Checks should be made payable to Allinson Infrared Inspection Services, Inc.

The seminar will begin at 08:00 and end at 16:30 with time allotted for lunch and breaks. Refreshments for morning and afternoon breaks and lunch may be purchased from vendors at the Boat Show.

Details of the seminar are as follows:

This seminar is designed for:

1. IR Thermographers who wish to use their equipment and expertise to assist Marine Surveyors.
2. Marine Surveyors who want to know how to incorporate IR into their businesses (either by doing the IR work directly or by subcontracting with a Certified Infrared Thermographer).
3. Employees of Marine Service & Repair Facilities.
4. Employees of Marine Insurance companies, adjusters, and Finance companies.

Preparation prior to seminar:

Seminar attendees are encouraged to submit their top 10 questions regarding "IR & applying IR to Marine Surveying" prior to the seminar. Questions that are received at least two (2) weeks prior to the seminar will be reviewed and discussed as the last topic of the seminar.

Discussion topics ...

1. Fundamentals of IR, how it is used in other industries, and how to apply it to the Marine Consulting and Services Industry.
2. How to get started, business thoughts, planning and training for success.
3. IR imaging, types of cameras and detectors
4. Equipment consideration by application (e.g. sensitivity versus resolution).
5. Software consideration (data collection, analysis, report writing).
6. Eight (8) applications for IR inspections in Marine Consulting and Services Industry.
7. How to prepare for inspection day.
8. How to interpret IR results.
9. How to present IR results.
10. A review of attendee questions received prior to the seminar.
11. Wrap up and final questions.

About Mr. Allinson

"JACK" has successfully used Infrared Thermography as an adjunct to his Marine Surveying and Consulting business since 2003 and routinely presents at internationally recognized conferences for Infrared Thermography.

Details regarding his services can be reviewed at www.allinson.com
